

Rachel Brem, MD, is board-certified in Diagnostic Radiology. She is a professor of radiology and the vice chair of radiology at The George Washington University School of Medicine & Health Sciences. Also, she is the director of Breast Imaging & Intervention and The GW Medical Faculty Associates Mobile Mammography Program. Dr. Brem completed

her undergraduate studies at Brandeis University followed by her medical education at Columbia University. Dr. Brem completed both her Diagnostic Radiology Residency and Breast Imaging Fellowship at the Johns Hopkins Medical Institutions.

Dr. Brem is the principal investigator of numerous clinical trials including molecular imaging approaches for the improved detection of breast cancer as well as identifying additional areas of unsuspected cancer in women with newly diagnosed breast cancer, as well as, Dr. Brem has published more than 80 journal articles and manuscripts related to breast cancer, and is the recipient of numerous honors and awards. Her advancements have led to many awards and honors. These include Newsweek Magazine naming her as a top cancer doctor, appearing on the Dr. Oz show - where Dr. Oz described her as a "cancer detective", being named a Woman To Watch by Jewish Women International, and being named Woman of the Year by the International Biographical Center. Dr. Brem works extensively with members of the Hill to fur education, awareness and legislature to optimize breast cancer diagnosis and treatment. As a breast cancer survivor herself, she understands and is committed to the science and the personal aspects of breast cancer.

Dr. Anita Mehta, MD, joined The GW Medical Faculty Associates in September 2015. She completed her radiology residency at Mount Sinai Medical Center in New York and then pursued sub-specialty training in both Breast Imaging and Pediatric Radiology. At GW, she currently serves at the assistant program director to the residency program and is an active member

of the Clinical Competency Committee. Her research interests include clinical uses of elastography and high risk breast lesions. Dr. Mehta has been a faculty speaker at many recent breast imaging courses including Breast Imaging in the Nation's Capital, the Mount Sinai Breast Imaging Update and categorical courses for the American Institute for Radiologic Pathology.

Jocelyn Rapelyea, MD, is board-certified in Diagnostic Radiology and an associate professor at The George Washington University School of Medicine & Health Sciences. Dr. Rapelyea also serves as the associate director of Breast Imaging and the director of Medical Student Education in Radiology. She specializes in diagnostic radiology and breast imaging. Dr. Rapelyea earned her

medical degree from the New Jersey Medical School. She completed a research fellowship with the University of Maryland Medical Systems, Neuroradiology Department followed by a radiology residency at The George Washington University Hospital. Dr. Rapelyea pursued further training in breast imaging and intervention as a fellow at The George Washington University Hospital. Dr. Rapelyea has received numerous honors and appointments throughout her career, including appointments to Chief Resident at The George Washington University Hospital, the National Executive Council for the American College of Radiology's Resident Physician Section, Who's Who in Medical Services Education, and is a Castle Connolly Top Doctor and Top Radiologist.

Dr. Rapelyea has been published in several peer-reviewed journals and abstracts and has made various national presentations, including a congressional briefing on "Imaging the Patient with Implants." Her published pieces can be found in various journals, including Radiology, Journal of Women's Imaging, The Breast Journal, and Clinical Radiology.

Denise Reinhart is a mammographer with the Mammovan Program. She helps to operate the Mammovan and provide mammograms to women who may not otherwise have access to them. She is passionate about helping others and dedicated to educating women on the importance of mammograms and early detection of breast cancer. Denise received her Radiology AS degree from NVCC. She

has worked for The GW Medical Faculty Associates for 4 years and prior to that worked in Radiology at GW Hospital for 6 years. She is currently pursuing her BSN to MPH at George Mason University. She enjoys spending time cooking with her daughter and dancing flamenco.

Contact Us

The Mammovan will be located at a pre-scheduled location and appointment times are from 9:30 a.m. to 3:30 p.m. Although we prefer scheduled appointments, we do allow walk-in appointments when available.

For more information or to book an appointment, please call: **202.741.3252** or visit us online at gwdocs.com/Mammovan.
