

SAFETY MEASURES WORK TOGETHER!

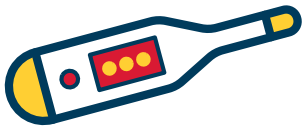

Use all 4 measures for all of our safety

SCREENING

Patients will undergo a **SYMPTOM ASSESSMENT** at time of scheduling.

A TEMPERATURE SCREENING will be performed in the lobby upon entry.

While asymptomatic COVID-19 infected people can spread the virus, the highest viral load is at the time of symptom onset.¹

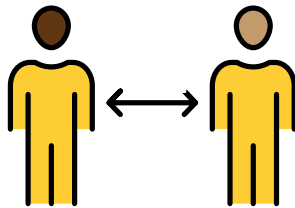

DISTANCING

MAINTAIN 6 FEET OF DISTANCING

Less than 10% of droplets travel more than 5.5 feet.²

Physical distance of more than 3.3 feet reduces chance of infection by 82%.³

Even further is better with every additional 3.3 feet providing 2-fold more protection.³

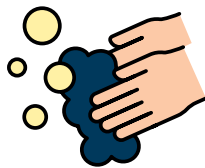

HYGIENE

EFFECTIVE CLEANING

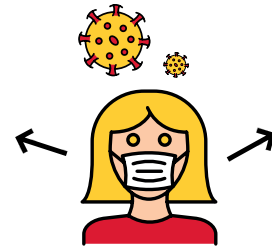

Effective cleaning reduces viral spread by 59%.⁴

FREQUENT HAND SANITIZING AND/OR WASHING

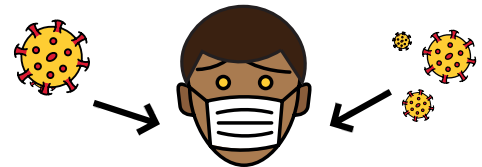

Hand washing decreases viral spread by 45%.^{4,5}

MASKING

PERSON WEARS SURGICAL MASK TO PROTECT OTHERS

Surgical masks reduce Coronavirus aerosol transmission to zero ($p=0.04$), and a trend toward droplet transmission to zero ($p=0.09$).⁶

PERSON WEARS SURGICAL MASK TO PROTECT SELF

Surgical masks reduce chance of infection by 67%.³

PERSON WEARS N95 MASK TO PROTECT SELF WHEN INDICATED BY PPE GUIDANCE

N95 masks prevent inhalation of 95% of 0.3 μ m particles.⁷
