

SAFETY MEASURES WORK TOGETHER!

Use all 4 measures for all of our safety

HYGIENE

FREQUENT HAND SANITIZING AND/OR WASHING

Hand washing decreases risk of viral spread by 45%.

EFFECTIVE CLEANING

Effective cleaning reduces viral spread by 59%.

SCREENING

Patients will undergo a **SYMPTOM ASSESSMENT** at time of scheduling.

A TEMPERATURE SCREENING will be performed when you come in. You can still spread the virus if infected even if you do not have symptoms.

DISTANCING

PHYSICAL DISTANCE 6 FEET APART

Less than 10% of droplets travel more than 5.5 feet.

Physical distance of more than 3.3 feet reduces chance of infection by 82%.

Even further is better with every additional 3.3 feet providing 2-fold more protection.

MASKING

WEAR A MASK TO PROTECT OTHERS

Surgical masks reduce Coronavirus spread almost to zero.

WEAR A MASK TO PROTECT YOURSELF

Surgical masks decrease risk of infection by 67%.
